Dear all,

I am pleased to share you that WHO Research Ethics online training course is now available on Global Health Training Center e-Platform. The course is comprehensive and addresses key 10 areas as individual modules—these include: introduction to research ethics; principles and guidelines; evaluating risks and benefits; issues in study design; understanding vulnerability; obligations to research participants; engaging with communities; privacy and confidentiality; informed consent ; other ethical issues.

I encourage all of you to go through it at your own pace, please share them with your technical programs. In addition, please share them with your national research institutes and other relevant stakeholders in the ministries, universities, and other training institutes who might benefit from this content.

Thanks and best regards,
